Art Unit: 3662

1. Claims 1-25 are rejected under 35 U.S.C. 112, second paragraph, as being indefinite for failing to particularly point out and distinctly claim the subject matter which applicant regards as the invention.

Throughout claims 1-25, the uses of the term "desensitization" are indefinite and unclear in context. Please see 37 CFR 1.75(d)(1).

In each of independent claims 1, 13, and 25, the phrase "parameters relating to desensitization" is indefinite and unclear in context. What are these? Are they measures of jamming? Please see 37 CFR 1.75(d)(1).

Dependent claims 2-12 and 14-24 are unclear in that they depend from unclear independent claims.

2. 35 U.S.C. 101 reads as follows:

Whoever invents or discovers any new and useful process, machine, manufacture, or composition of matter, or any new and useful improvement thereof, may obtain a patent therefor, subject to the conditions and requirements of this title.

Claim 25 is rejected under 35 U.S.C. 101 because the claimed invention is directed to non-statutory subject matter. Claim 25 claims a computer program, but it does not reside on a computer-readable medium. Please see the Guidelines in MPEP 2106, especially note section IV.B.1. of the Guidelines.

3. The prior art made of record and not relied upon is considered pertinent to applicant's disclosure.

The examiner-cited prior art is of general interest for showing systems and methods of making measurements that in various ways relate to jamming. Jamming desensitizes radar receivers.
